

WEEK 1 REPORT

Name: Rayudu Laharika

Domain: Web Development / Full Stack Development

Date of Submission: 29-04-26

Week Ending: 01

I. Overview

This week, the primary focus was on developing a Social Media Mini App using HTML, CSS, and JavaScript. The project included implementing user login functionality, comment posting system, like button feature, and local storage support for saving likes and comments. The goal was to improve frontend development skills and understand JavaScript DOM manipulation.

II. Achievements

1. Project Development

Name of the project: Social Media Mini App

- Designed the user interface using HTML and CSS.
- Created Login Section with username and password validation.
- Added Comment Section where users can post comments.
- Implemented Delete Comment functionality.
- Developed Like Button feature with live like count update.
- Used Local Storage to save likes and comments permanently.

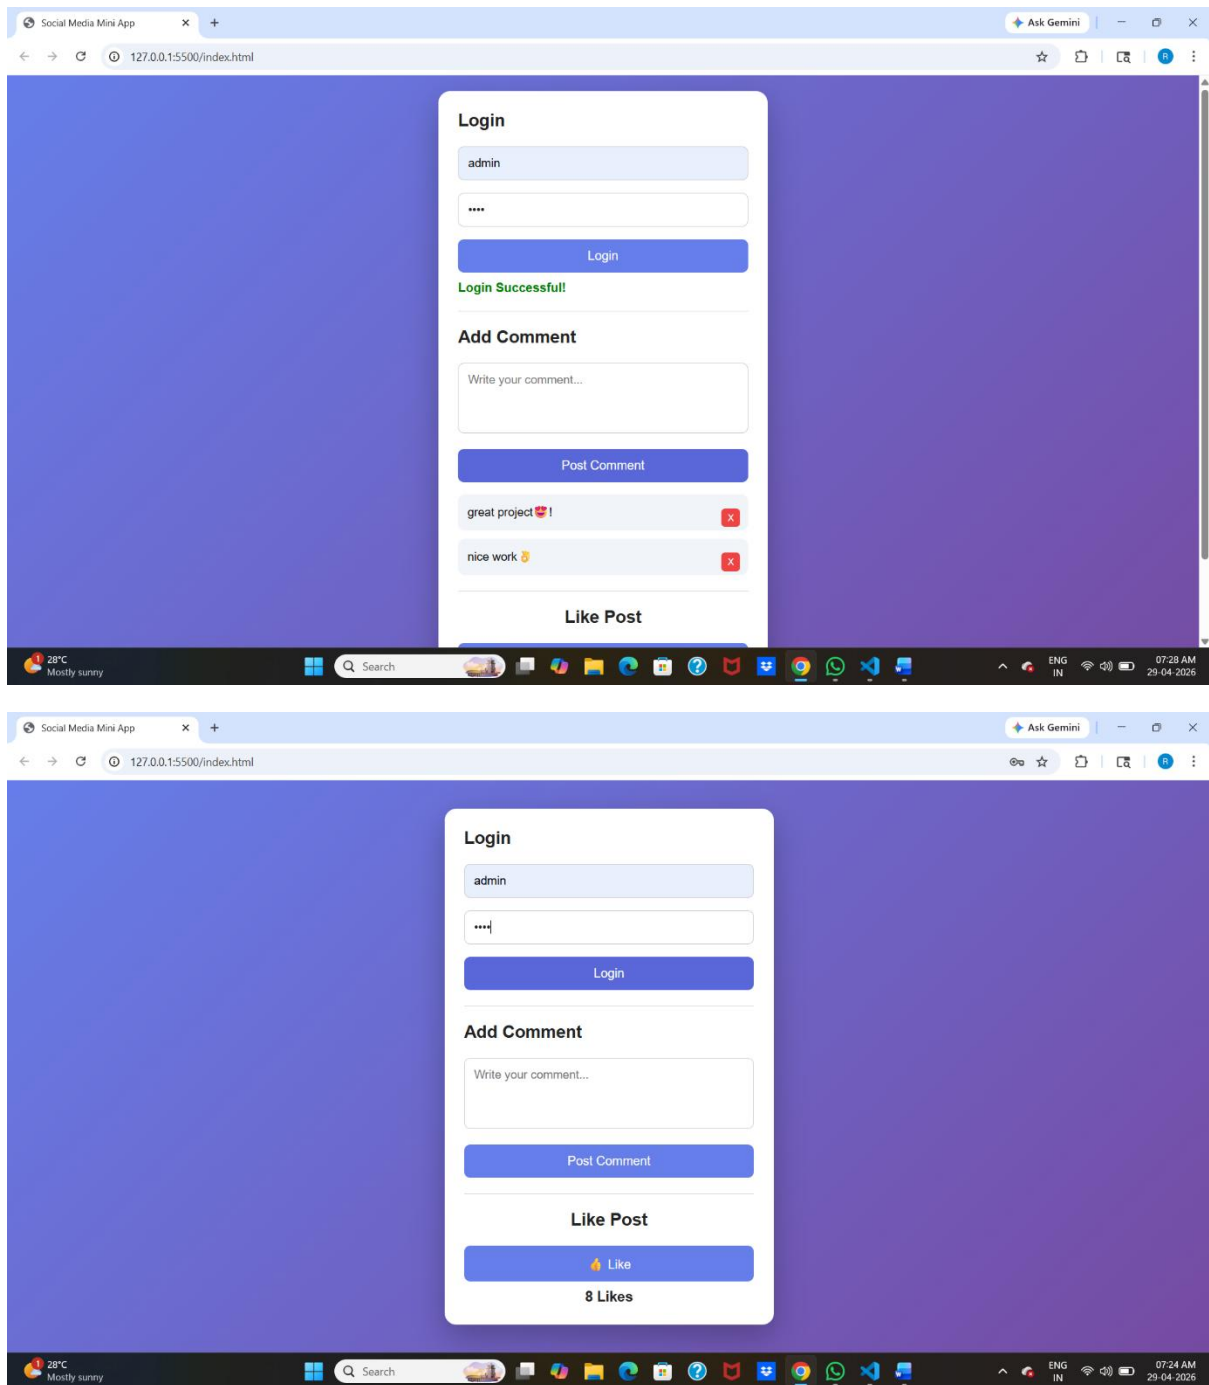

2. JavaScript Implementation

- Applied JavaScript for form validation and event handling.
- Used DOM manipulation to dynamically display comments.
- Implemented functions like login(), addComment(), deleteComment(), and likePost().

3. Learning Web Development

- Improved understanding of HTML structure and form creation.
- Learned CSS styling techniques for professional UI design.
- Practiced JavaScript concepts like functions, arrays, localStorage, and events.

Project Screenshots

III. Challenges

1. JavaScript Validation Issues

- Faced issues while validating login credentials and handling empty input fields.
- Solved the problem by using `trim()` and proper if-else conditions.

2. Comment Storage Handling

- Initially had difficulty storing comments permanently.

- Learned how to use localStorage and JSON methods to save and retrieve comments successfully.

IV. Learning Resources

1. HTML, CSS, JavaScript Tutorials

- Used YouTube tutorials and online documentation for frontend development.
- Referred to examples for form design and JavaScript functions.

2. Practice and Debugging

- Used browser console for debugging JavaScript errors.
- Improved problem-solving by testing code multiple times.

V. Next Week's Goals

1. Project Enhancement

- Add user profile section to the Social Media Mini App.
- Improve design responsiveness for mobile devices.
- Add edit comment functionality.

2. Advanced JavaScript Learning

- Learn more about arrays, objects, and advanced DOM concepts.
- Practice mini projects for stronger frontend skills.

VI. Additional Comments

This week provided strong practical experience in frontend web development. Building this project improved coding confidence and helped in understanding real-world project structure. The experience of solving errors and improving features was highly valuable.
