

Name: Rayudu Laharika

Domain: Full Stack Development

Date of Submission: 13-05-2026

Week Ending: 03

I. Overview

This week, the primary focus was on learning JDBC concepts and understanding backend development using Java. I worked on a Student Management System project using Java to perform student record operations such as adding and viewing student details. Additional efforts were made to improve Java programming and problem-solving skills.

II. Achievements

1. JDBC and Java Learning:

- Completed JDBC Introduction module.
- Learned Java backend programming concepts.
- Practiced Java classes, objects, and ArrayList usage.

2. Project Development:

Name of the project:- Student Management System

- Created a Java console-based student management project.
- Implemented Add Student functionality.
- Implemented View Students functionality.
- Practiced user input handling using Scanner class.

3. Backend Development Practice:

- Improved understanding of Java logic building.

- Practiced object-oriented programming concepts.
- Learned basic backend workflow and data management.

III. Challenges

1. Java Logic Building:

- Faced difficulty while managing student records using ArrayList.
- Required multiple tests to understand program flow.

2. Debugging:

- Encountered small syntax and input handling errors.
- Improved debugging skills through repeated practice.

IV. Learning Resources

1. Upskill Campus Learning Portal:

- Utilized JDBC Introduction and Java learning modules.
- Completed weekly learning activities and practice tasks.

2. Java Learning Resources:

- Practiced Java concepts through project implementation.
- Referred to online tutorials and Java documentation for better understanding.

V. Next Week's Goals

1. Backend Improvement:

- Improve Java programming skills.
- Learn advanced backend concepts.

2. Project Enhancement:

- Add more functionalities to Java projects.

- Practice database connectivity concepts.

VI. Additional Comments

This week helped improve my backend development understanding and Java programming skills. Working on the Student Management System project increased my confidence in Java logic building and problem solving.
